Pain-Management Coaching: Integrative and Complementary Strategies for Complicated Pain

Becky Curtis, NBC-HWC
Disclosure

- None
Learning Objectives

▪ Learn how coaching establishes restorative partnerships with patients
▪ Identify several contributing factors to non-functionality and how techniques used in pain management coaching increase compliance and functionality.
▪ Learn positive effects of groups in pain management
I am tired
I get complaints all day
People are demanding things I can’t give
The tools I have I don’t have time to share
I feel skeptical that anything will work
Listening to you has given me hope
Patient perspective

- I am hopeless
- I am broken and heartbroken
- I desperately want an answer
- Why can’t modern medicine fix this?
- I am skeptical that anything will work
Believer
Problem Patient/Larry

- Angry at doctor
- Angry at Workers Comp
- 2 heart attacks due to anger and pain related stress
- Very frustrated about his inability to have any semblance of his former active lifestyle as a parent and a business man
What is Health & Wellness Coaching?

Health and Wellness Coaches **partner** with clients seeking self-directed, lasting changes, aligned with their values, which promote health and wellness and, thereby, enhance well-being. In the course of their work health and wellness coaches display **unconditional positive regard** for their clients and a belief in their **capacity for change**, and honoring that each client is **an expert** on his or her life, while ensuring that all interactions are **respectful and non-judgmental**.

NCHWC
Education
The Paradigm Shift

Moving from a passive “Cure me” mentality to realizing there are active things that can be done to manage the experience of pain.
The Paradigm Shift

“Cure me” → “I accept my pain”

“I suffer with pain” → “I LIVE with pain”

Pain as a sensation → Pain as an experience
What we focus on
we empower
and enlarge
The Brain Learns Pain:

▪ 5% of nerve cells are normally dedicated to pain processing
▪ Chronic pain expands this to 15-25% of the cells
▪ The process of repetition reinforces the strengthening of brain pathways
▪ This causes anatomical changes in the brain

The longer we have been negative, angry and passive, the more brain change we will need to make. Because of the plasticity in our brain, everything is reversible. In the same way that muscles and joints can be made more healthy and robust, so too can the homunculus arrangements in your brain.
“...Adults learn best when they are provided with opportunity to discover knowledge and insights for themselves. Coaching rests on this premise of discovery for self, with the client having the expertise and answers.”

Jennifer Britton, Effective Group Coaching, 2010
The Coach Approach

Builds a working relationship based on respect for the patient’s ability to choose the right path for functionality.

– This style increases self-motivation.
– The patient has a greater sense of ownership.
– Patient will be more likely to start making and continue behavior change.
What makes Pain-Management Coaching Different?

- Long-term approach
- Collaborative approach
- Walking clients through the challenges of changing the way they think about pain
- Making everyday choices to reduce pain and the perception of pain
- Learning-through-doing approach
- Facilitated by coaches who understand the nature of pain and patient mindsets that contribute to failure and hopelessness.
